PHILIPPE

“Political, ethical, subversive, ecological, fun: this is how I see my duty as a creator.” Philippe Starck.

Despite more than 10 000 creations - completed or in the making - his global fame and his tireless protean inventiveness, never forget the essential. Philippe Starck has a mission and a vision: creation, whatever shape it takes, must make life better for the largest number of people possible. Starck believes this highly poetic, political, rebellious, benevolent, pragmatic and subversive duty must be borne by all and he resumes it with the humour that has accompanied his approach since the earliest days: “No one is forced to be a genius, but everyone has to take part.”

This citizen of the world, who considers it his duty to share his ethical and subversive vision of a fairer planet, creates unconventional places and objects whose purpose is to be “good” before being beautiful.

His profound comprehension of contemporary mutations, his enthusiasm for imagining new lifestyles, his determination to change the world, his devotion to a positive reduction, his love of ideas, his desire to defend the intelligence of usefulness - and the usefulness of intelligence - have accompanied one iconic creation after the other... From everyday products such as furniture and lemon squeezers, to revolutionary mega-yachts, hotels and restaurants that aspire to be wondrous, stimulating and intensely vibrant places, Starck never ceases to push the boundaries and criteria of contemporary design.

Inventor, creator, architect, designer, artistic director, Philippe Starck is all of the above, but above all he is a man of honesty, in the purest tradition of the Renaissance artists.
